Dragos Vasiliu

Full Stack Developer | Laravel, React and web systems | Monferrato, Piedmont, Italy | Category B driving licence
vasiliu.petru.dragos@gmail.com | github.com/DragosAlien | linkedin.com/in/dragos-vasiliu-332b57272

Profile

Full Stack Developer with over three years of experience developing and maintaining web applications used in production. I mainly work across the full stack, with a particular interest in frontend development, while also contributing regularly to backend development, databases and API integrations. My primary technologies are **Laravel, PHP, React and JavaScript**.

Working in a small company has given me experience across several stages of the development process, including requirements analysis, implementation, debugging, deployment and maintenance. I use **Docker and Linux** to support application development and operations, and contribute to technical decisions within the projects I work on. I approach problems with curiosity, pragmatism and attention to code quality. Since 2023, I have also been exploring **LLMs, AI agents, MCP, RAG and GraphRAG**, building prototypes and tools for development automation and document retrieval.

Professional experience

Software Developer - PARENTESIKUADRA

Dec 2023 - Present

Casale Monferrato | Hybrid

- Develop Laravel applications for production environments, working on backend logic, databases, APIs, React/Inertia.js interfaces, Docker containerisation and production releases.
- Contribute to the ongoing development of Klancy, a multi-tenant application using WebSockets and supporting extensive client-specific configuration and customisation.
- Build integrations with Fluida and Tilby through APIs, generate XML files for imports into G1 and work with AHRW SOAP services.
- Diagnose and fix frontend and backend issues, including API and Laravel logic defects and incompatible Composer and npm dependencies.
- Handle deployment and debugging activities on Linux/Plesk environments, including Linux system migrations.
- Manage projects and support requests directly, discussing requirements with clients, implementing solutions and supporting their ongoing maintenance.

Technologies: PHP, Laravel, React, Inertia.js, JavaScript, Node.js, Redis, Docker, Linux, Git, REST APIs, SOAP, XML, WebSockets, SQL, Electron, Composer, npm

Junior Frontend Developer - PARENTESIKUADRA

May 2023 - Dec 2023

Casale Monferrato | On-site | Internship

- Developed responsive React interfaces and integrated them with Laravel applications and backend services.
- Fixed frontend defects and supported testing and maintenance activities using Git.

Technologies: React, JavaScript, HTML, CSS, Laravel, Git

Junior Full Stack Developer - Syrma Soluzioni Informatiche S.r.l.

Sep 2022 - Apr 2023

On-site | Full-time

- Developed Drupal and PHP web applications and mobile applications with React Native.
- Fixed defects and delivered small enhancements, collaborating with the team through Git.

Technologies: React Native, Drupal, PHP, JavaScript, HTML, CSS, SQL, Git

Education

Diploma in Computer Science - ITIS Ascanio Sobrero

2014 - 2019

Casale Monferrato

Upper secondary school diploma specialising in computer science.

Technical skills

Backend: PHP and Laravel for application logic and integrations | REST and SOAP APIs | XML generation | Node.js for services, scripts and automation | Redis

Frontend: React | Inertia.js | JavaScript | HTML5 | CSS3 | Tailwind | TanStack Table | WebSockets

DevOps and systems: Docker | Linux | Plesk | SSH | cron | Restic | deployment | debugging and operational maintenance

Tools: Git | Composer | npm

Artificial intelligence: Prototypes and automation using LLMs | AI agents | MCP | RAG | GraphRAG | Claude Code | Codex

Languages

Italian: Native | Romanian: C2 | English: B2

CEFR levels are self-assessed and not certified.
